7. STABILITY
Atmospheric moisture and carbon dioxide reacts readily with STB to produce Sodium hydroxide and Sodium carbonate. Tertiary butanol is liberated from these reactions. It develops yellow to brown color solution after reacting with water. STB should be stored in a cool place away from heat, sparks and flame.

8. PACKAGING
a. sample packing from 100 gms to 500 gms
b. 1 kg. packing
c. 5 kgs. packing
d. 10 kgs. packing 2 x 5 kgs
e. 50 kgs. Packing 5 x 10 kgs
f. Any other packing as per customer request

9. SAMPLING INSTRUCTIONS
a. The product is packed under dry nitrogen with positive pressure of nitrogen inside the drum.
b. The quality of the product deteriorates very fast if exposed to atmosphere even for a brief period.
c. While sampling, please ensure that the sample is taken out under dry nitrogen in a preweighed stoppered bottle and analysis is done immediately.
d. After sampling, tie the bag securely with a thread, put positive nitrogen pressure in the drum and tighten it properly. This is very important so that the product does not deteriorate on storage.
